

JWR Management System Manual (v1.0.0)

Updated: November 11, 2022

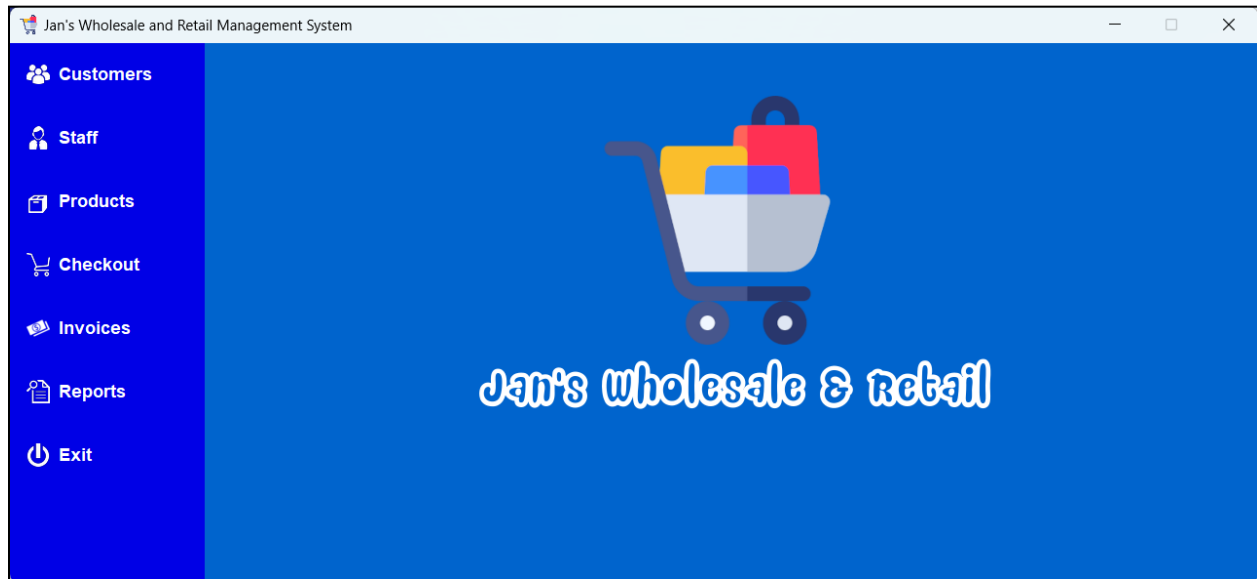

Overview

The JWR Management System was developed to streamline our business processes. The software allows us to quickly view and modify items in stock, manage customer data, manage employees, document customer purchases, and generate product reports. This document serves as a user manual to inform staff members how to use the JWR Management system to conduct daily operations at our store.

Application User Interface

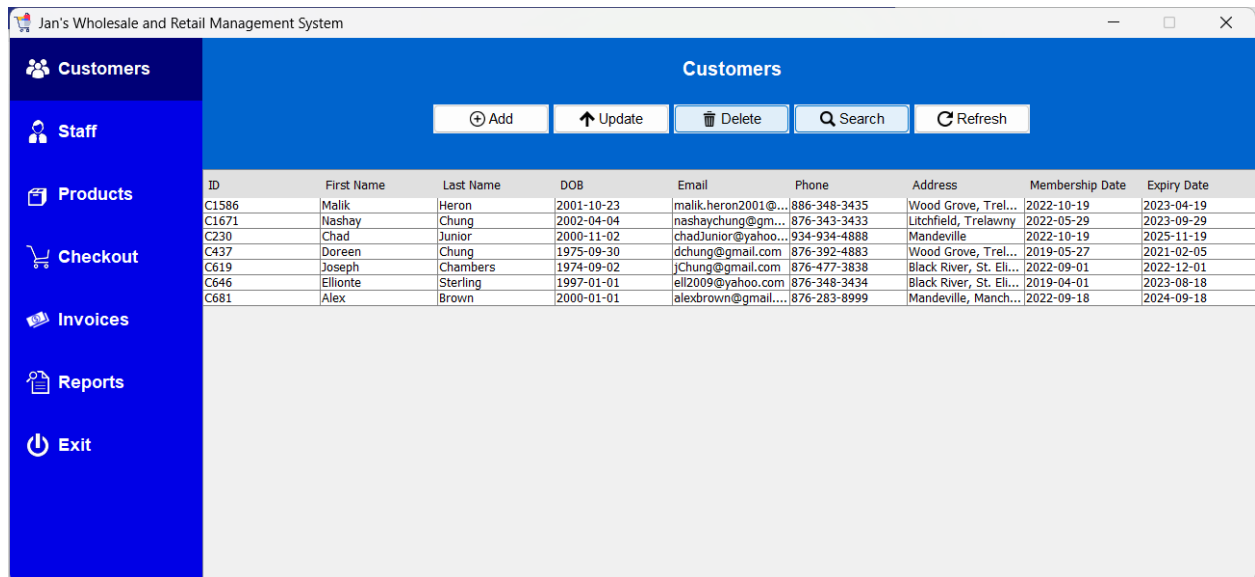

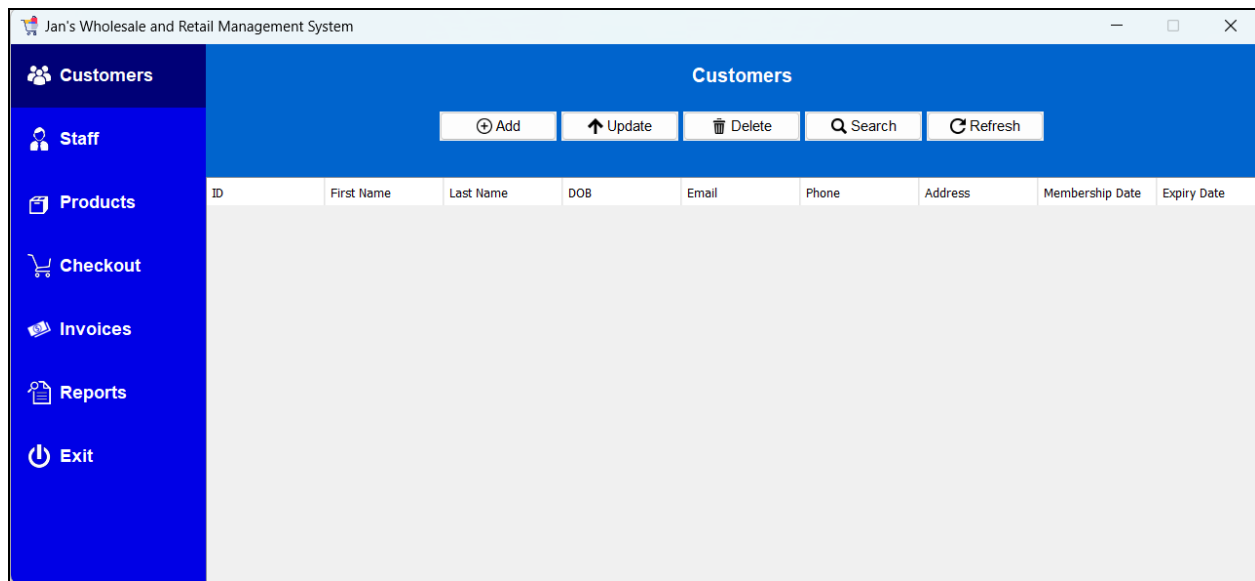

The application used by managers and cashiers

Home/Splash Screen

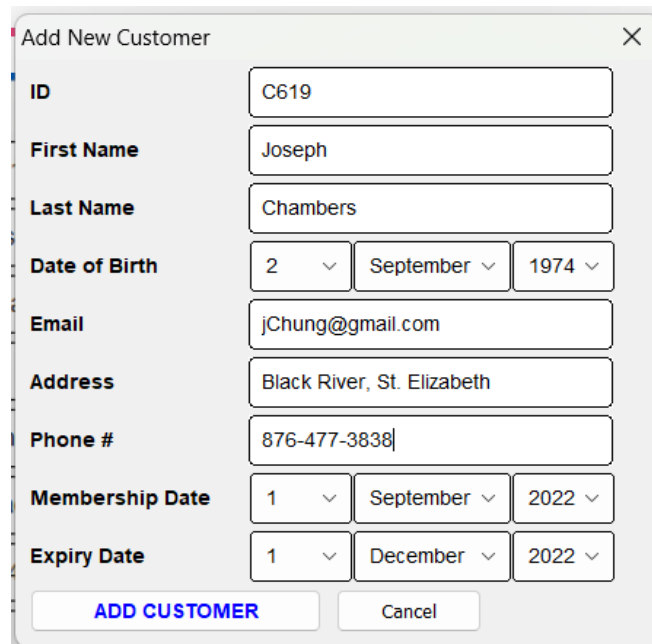

This screen is presented at startup. From here you will be able to navigate to various sections of the application depending on what you wish to accomplish. On the left is a list of buttons (tabs) corresponding to different aspects of our operation. For example, To add or view a customer, choose the "Customers" tab on the left.

Customers Screen

On the Customers screen, you will see a list of all registered customers in the system and their details. At the top of the screen five(5) actions can be taken:

- **Adding a Customer**
 - After clicking the add button you will see the prompt below to enter new customer information.

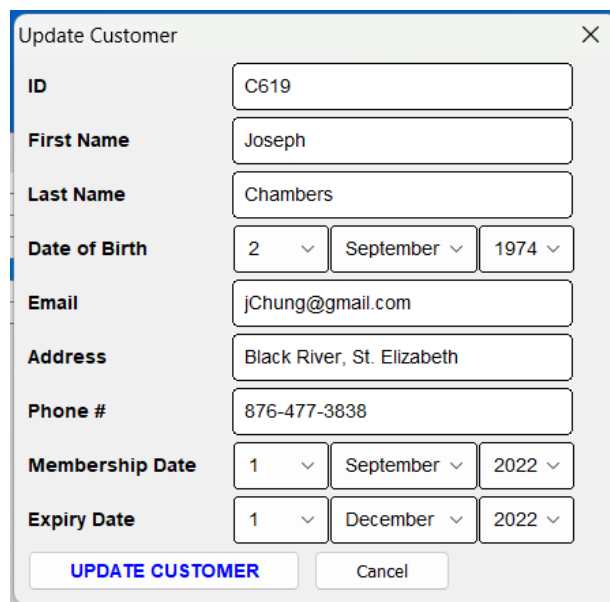

A dialog box titled "Add New Customer" with a close button (X) in the top right corner. It contains several input fields for customer information: ID (C619), First Name (Joseph), Last Name (Chambers), Date of Birth (2 September 1974), Email (jChung@gmail.com), Address (Black River, St. Elizabeth), Phone # (876-477-3838), Membership Date (1 September 2022), and Expiry Date (1 December 2022). At the bottom, there are two buttons: "ADD CUSTOMER" and "Cancel".

ID	C619
First Name	Joseph
Last Name	Chambers
Date of Birth	2 September 1974
Email	jChung@gmail.com
Address	Black River, St. Elizabeth
Phone #	876-477-3838
Membership Date	1 September 2022
Expiry Date	1 December 2022

ADD CUSTOMER Cancel

- **Updating an Existing Customer**

- The update button will search for the selected customer and then fetch and display the corresponding data in a prompt. The user would then be allowed to enter any current changes to that customer.

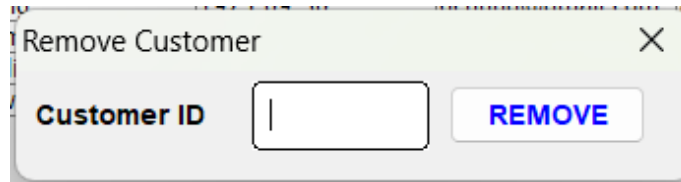

A dialog box titled "Update Customer" with a close button (X) in the top right corner. It contains the same input fields as the "Add New Customer" dialog, pre-filled with the same data: ID (C619), First Name (Joseph), Last Name (Chambers), Date of Birth (2 September 1974), Email (jChung@gmail.com), Address (Black River, St. Elizabeth), Phone # (876-477-3838), Membership Date (1 September 2022), and Expiry Date (1 December 2022). At the bottom, there are two buttons: "UPDATE CUSTOMER" and "Cancel".

ID	C619
First Name	Joseph
Last Name	Chambers
Date of Birth	2 September 1974
Email	jChung@gmail.com
Address	Black River, St. Elizabeth
Phone #	876-477-3838
Membership Date	1 September 2022
Expiry Date	1 December 2022

UPDATE CUSTOMER Cancel

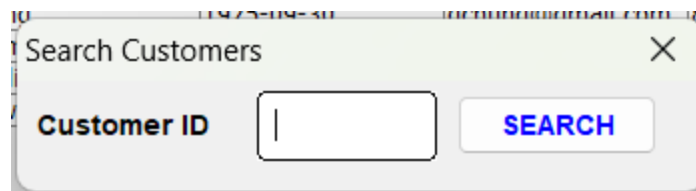

- **Deleting a Customer**

- The delete button searches and removes existing customer information from the database. This can be done by selecting the row of the table which contains the customer information you wish to remove, then clicking the delete button. You could also select the delete button and then enter the ID number for the customer you wish to remove.

A dialog box titled "Remove Customer" with a close button (X) in the top right corner. It contains a label "Customer ID" followed by a text input field with a vertical cursor. To the right of the input field is a button labeled "REMOVE" in blue capital letters.

- **Search for a Customer**

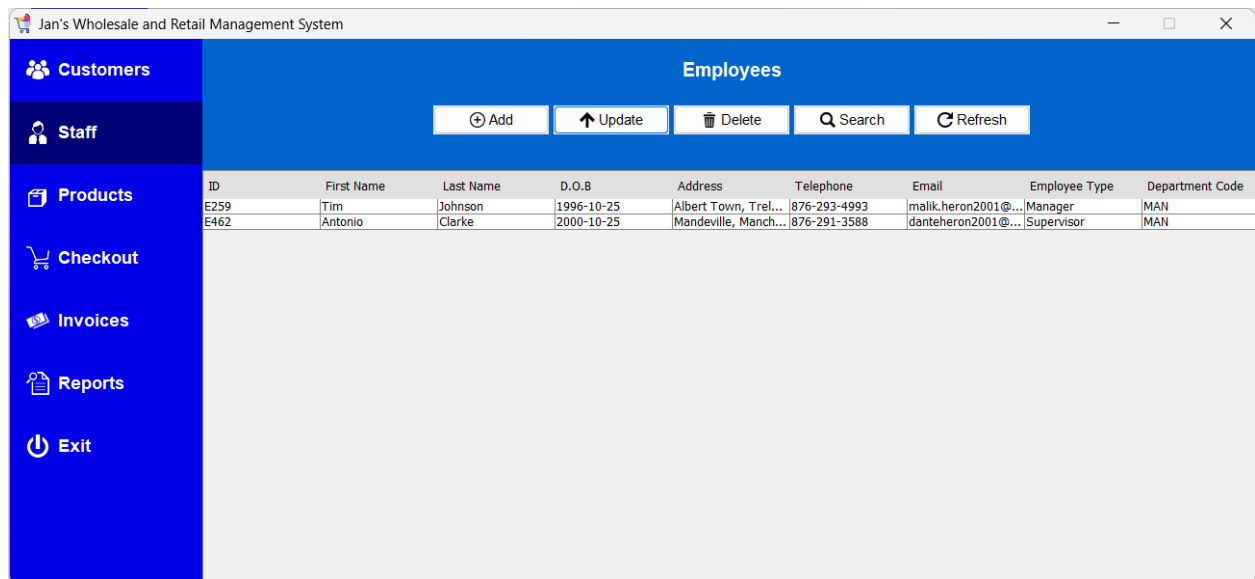

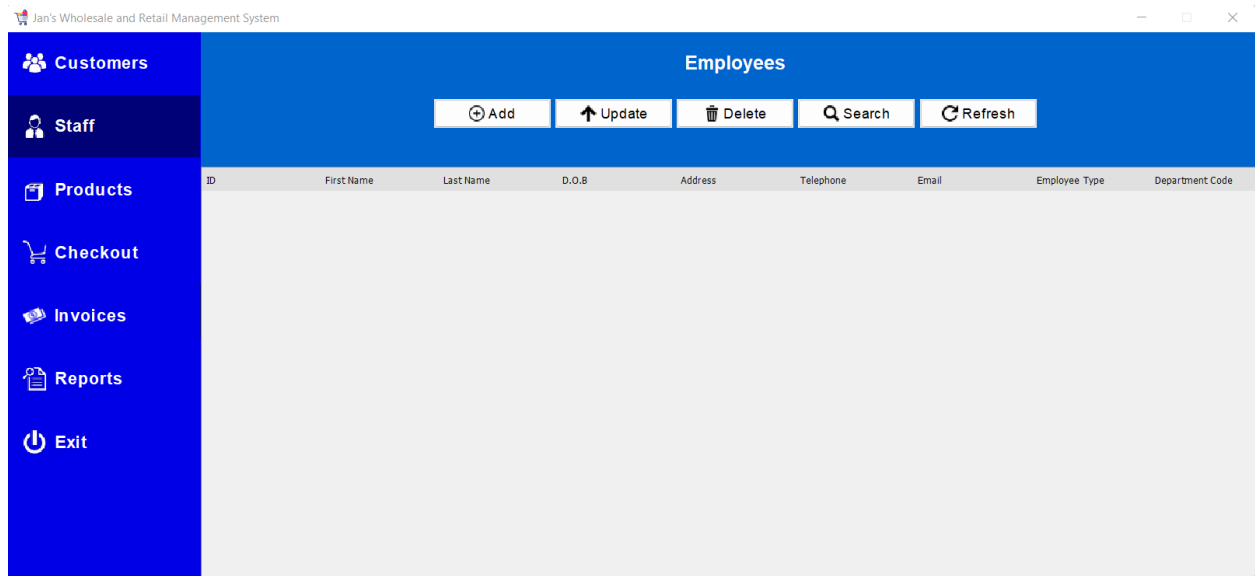

- The search button searches the database using the customer ID entered in the prompt. If the customer's record exists in the server's database, the corresponding customer details will be displayed to the user.

A dialog box titled "Search Customers" with a close button (X) in the top right corner. It contains a label "Customer ID" followed by a text input field with a vertical cursor. To the right of the input field is a button labeled "SEARCH" in blue capital letters.

- **Refresh**

- The refresh button will fetch and display the latest customer data from our servers.

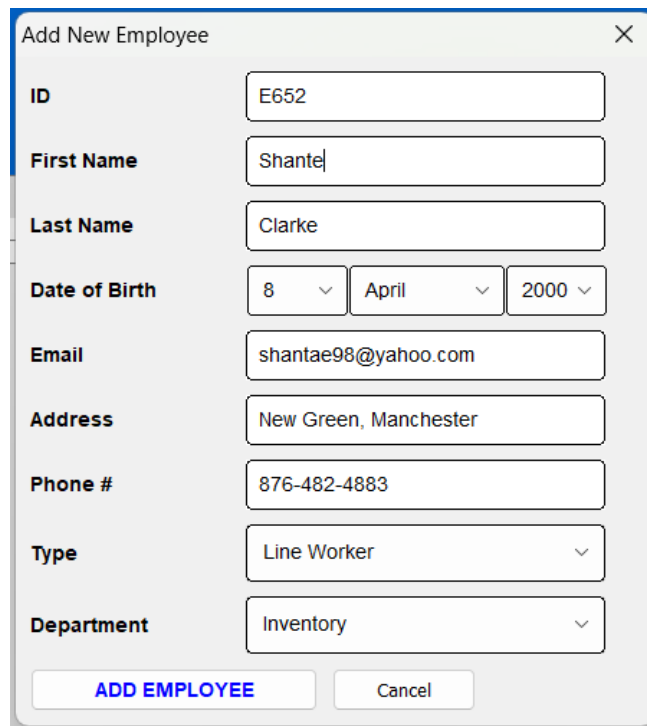

Employees Screen

On the Employee Screen, you may view a list of all persons that are employed by Jan's wholesale and retail organization. This screen shows a list of records that are used to track and maintain information about each staff. At the top of the screen, five (5) actions can be performed:

- **Adding an employee**

- After clicking the add button you will see the prompt below to enter new employee information.

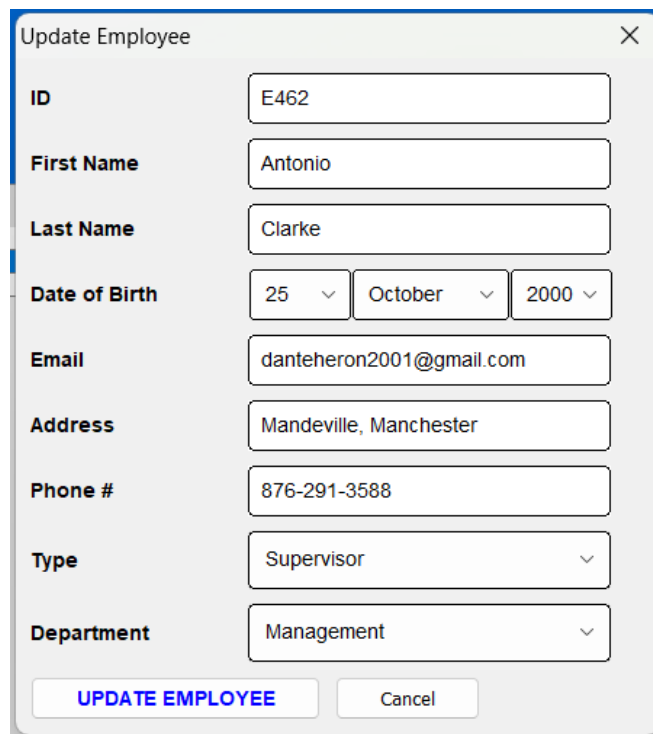

A screenshot of a web application form titled "Add New Employee" with a close button (X) in the top right corner. The form contains several input fields for employee data. The fields and their values are: ID (E652), First Name (Shantel), Last Name (Clarke), Date of Birth (8 April 2000), Email (shantae98@yahoo.com), Address (New Green, Manchester), Phone # (876-482-4883), Type (Line Worker), and Department (Inventory). At the bottom of the form are two buttons: "ADD EMPLOYEE" in blue text and "Cancel" in black text.

ID	E652
First Name	Shantel
Last Name	Clarke
Date of Birth	8 April 2000
Email	shantae98@yahoo.com
Address	New Green, Manchester
Phone #	876-482-4883
Type	Line Worker
Department	Inventory

ADD EMPLOYEE Cancel

- **Updating existing employee data**
 - The update button will search for the selected employee and then fetch and display the corresponding data in a prompt. The user would then be allowed to enter any current changes to that employee.

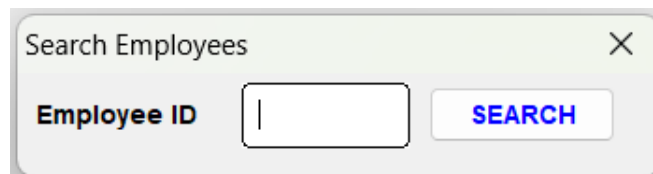

A dialog box titled "Update Employee" with a close button (X) in the top right corner. It contains several input fields for employee details: ID (E462), First Name (Antonio), Last Name (Clarke), Date of Birth (25, October, 2000), Email (danteheron2001@gmail.com), Address (Mandeville, Manchester), Phone # (876-291-3588), Type (Supervisor), and Department (Management). At the bottom, there are two buttons: "UPDATE EMPLOYEE" and "Cancel".

ID	E462
First Name	Antonio
Last Name	Clarke
Date of Birth	25 October 2000
Email	danteheron2001@gmail.com
Address	Mandeville, Manchester
Phone #	876-291-3588
Type	Supervisor
Department	Management

UPDATE EMPLOYEE Cancel

- **Searching for an employee**

- The search button searches the database using the employee ID entered in the prompt. If the employee's record exists in the server's database, the corresponding employee details will be displayed to the user.

A dialog box titled "Search Employees" with a close button (X) in the top right corner. It contains a label "Employee ID" followed by an input field with a vertical cursor and a "SEARCH" button.

Employee ID | **SEARCH**

- **Deleting an employee's data**

- The delete button searches and removes an employee's existing information from the database. This can be done by selecting the row of the table which contains the customer information you wish to remove, then clicking the delete button. You could also select the delete button and then enter the ID number for the customer you wish to remove.

A dialog box titled "Remove Employee" with a close button (X) in the top right corner. It contains a label "Employee ID" followed by a text input field and a button labeled "REMOVE" in blue text.

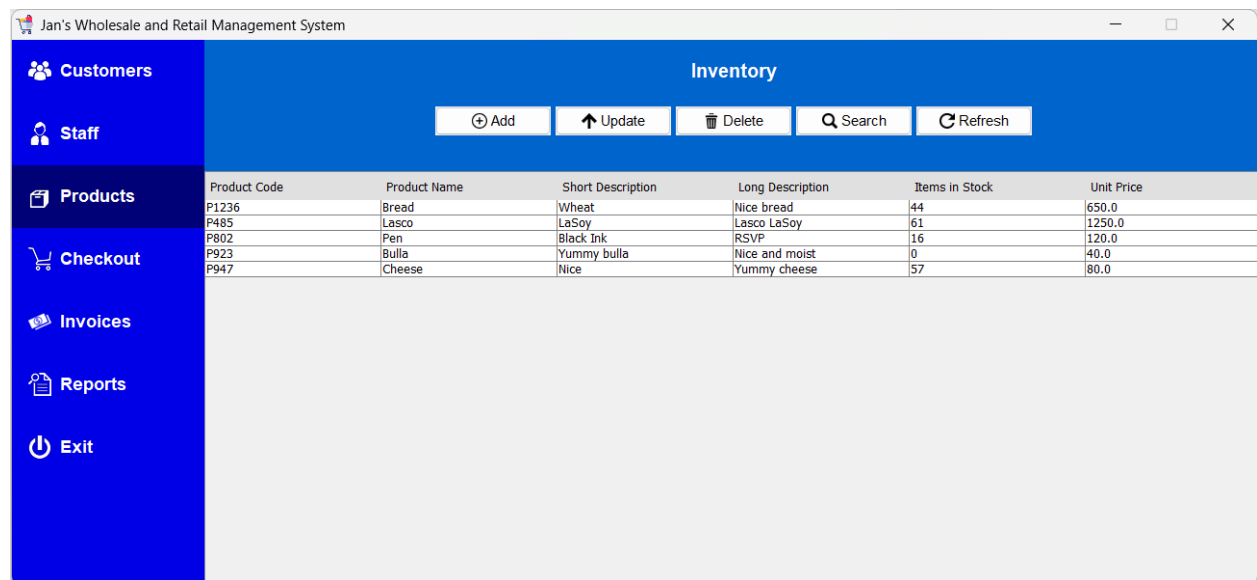

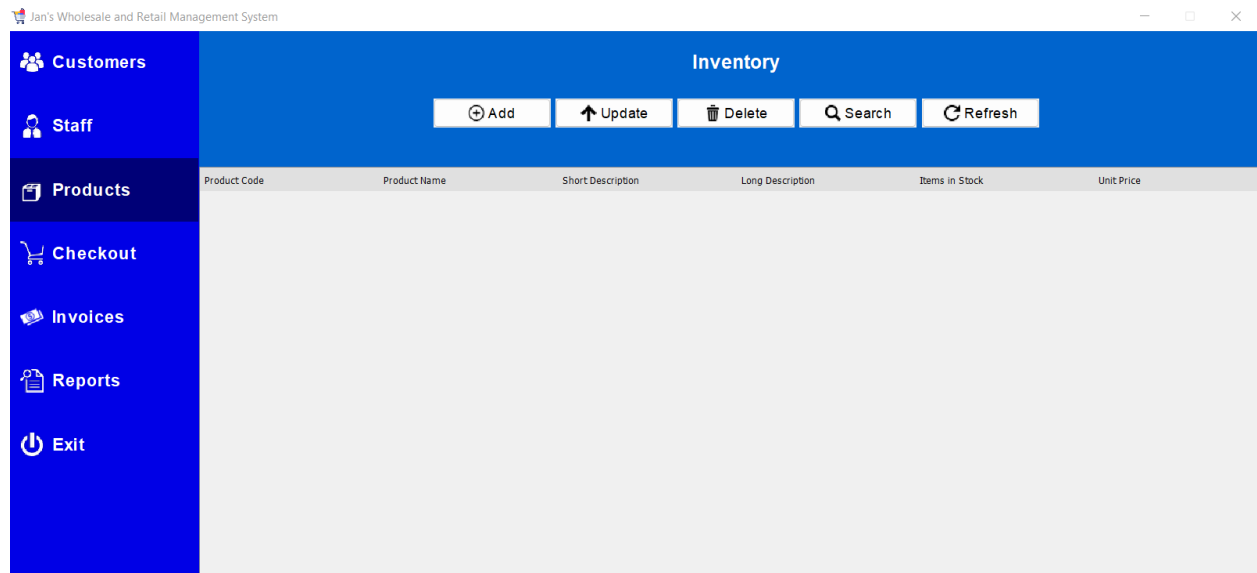

Remove Employee

Employee ID

REMOVE

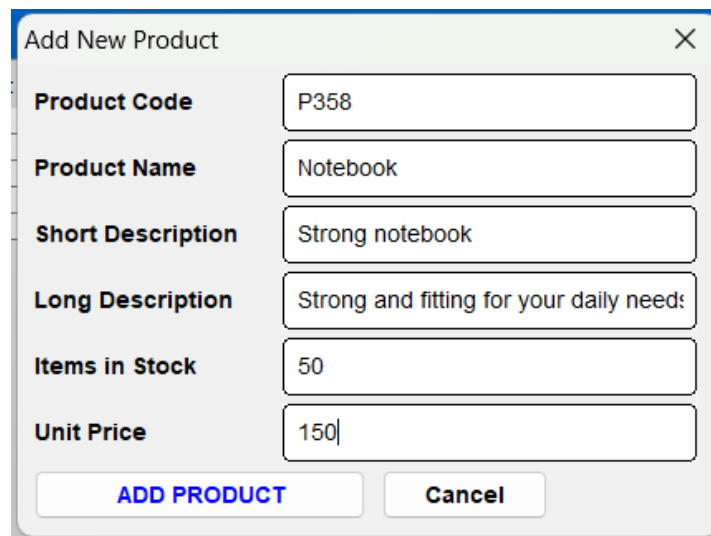

- **Refreshing the employee screen**
 - The refresh button will fetch and display the latest data from our servers

Product Screen

On the inventory screen, you may view a list of all items in stock (inventory). This screen shows a list of products and is used to track and maintain information about each product that has been sold. At the top of the screen, five (5) actions can be performed:

- **Adding a product**
 - After clicking the add button, you will be prompted to enter new product details to add to the inventory list as shown below.

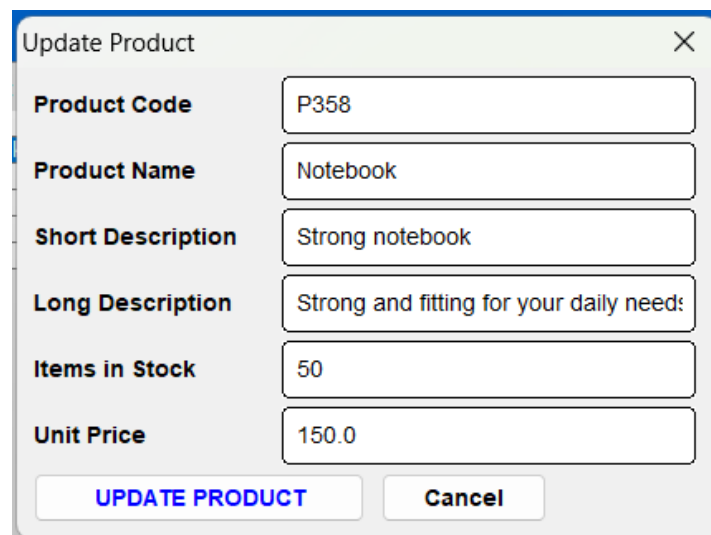

A dialog box titled "Add New Product" with a close button (X) in the top right corner. It contains six input fields for product details: Product Code (P358), Product Name (Notebook), Short Description (Strong notebook), Long Description (Strong and fitting for your daily need:), Items in Stock (50), and Unit Price (150). At the bottom are two buttons: "ADD PRODUCT" and "Cancel".

Product Code	P358
Product Name	Notebook
Short Description	Strong notebook
Long Description	Strong and fitting for your daily need:
Items in Stock	50
Unit Price	150

ADD PRODUCT **Cancel**

- **Updating existing product data**
 - The update button will search for an existing product code and then fetch and display the data for that product. It will then prompt the user to enter any current changes to that product.

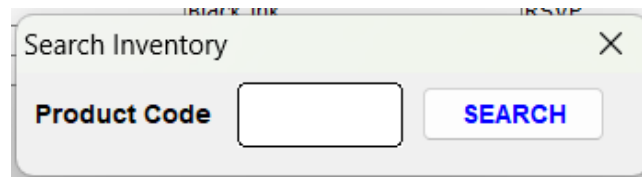

A dialog box titled "Update Product" with a close button (X) in the top right corner. It contains six input fields for product details: Product Code (P358), Product Name (Notebook), Short Description (Strong notebook), Long Description (Strong and fitting for your daily need:), Items in Stock (50), and Unit Price (150.0). At the bottom are two buttons: "UPDATE PRODUCT" and "Cancel".

Product Code	P358
Product Name	Notebook
Short Description	Strong notebook
Long Description	Strong and fitting for your daily need:
Items in Stock	50
Unit Price	150.0

UPDATE PRODUCT **Cancel**

- **Searching for a product**
 - The search button searches the inventory database by product code for an existing product record and then displays the corresponding detail to the user.

A dialog box titled "Search Inventory" with a close button (X) in the top right corner. It contains a label "Product Code" followed by a text input field and a button labeled "SEARCH" in blue capital letters.

- **Deleting a product's data**

- The delete button searches and removes existing product information from the database.

A dialog box titled "Remove Product" with a close button (X) in the top right corner. It contains a label "Product Code" followed by a text input field and a button labeled "REMOVE" in blue capital letters.

- **Refreshing the product screen**

- The refresh button will fetch and display the latest data from our servers

Checkout Screen

Jan's Wholesale and Retail Management System

Check Out

Customer ID: C0000 **Add customer** Staff ID:

Product Code: **Search** Quantity:

Item: Unit Price:

Add **Delete** **Clear** **Checkout**

Product Code	Product Name	Quantity	Unit Price	Cost
--------------	--------------	----------	------------	------

Jan's Wholesale and Retail Management System

Check Out

Customer ID: C646 **Add customer** Staff ID: E462

Product Code: **Search** Quantity:

Item: Unit Price:

Add **Delete** **Clear** **Checkout**

Product Code	Product Name	Quantity	Unit Price	Cost
P1236	Bread	2	650.0	1300.0
P485	Lasco	1	1250.0	1250.0
P923	Bulla	6	40.0	240.0

There are six buttons on the checkout screen, each of which corresponds to a different action that can be taken by the user. If the customer is not enrolled in John's wholesale membership program, the customer ID is automatically issued the default number "C0000." The display of this ID number is seen in the image above.

The table below the adjacent buttons stores the list of items that are added to the customer's cart to be cashed, along with some of their attributes. The checkout screen allows a staff member to complete the following task through the use of buttons:

- **Add Customer**

- The add customer button allows the user to add a new member to Wholesale's membership program. It works just the same as the add button on the customer screen. After clicking the add button you will see the prompt below to enter new customer information.

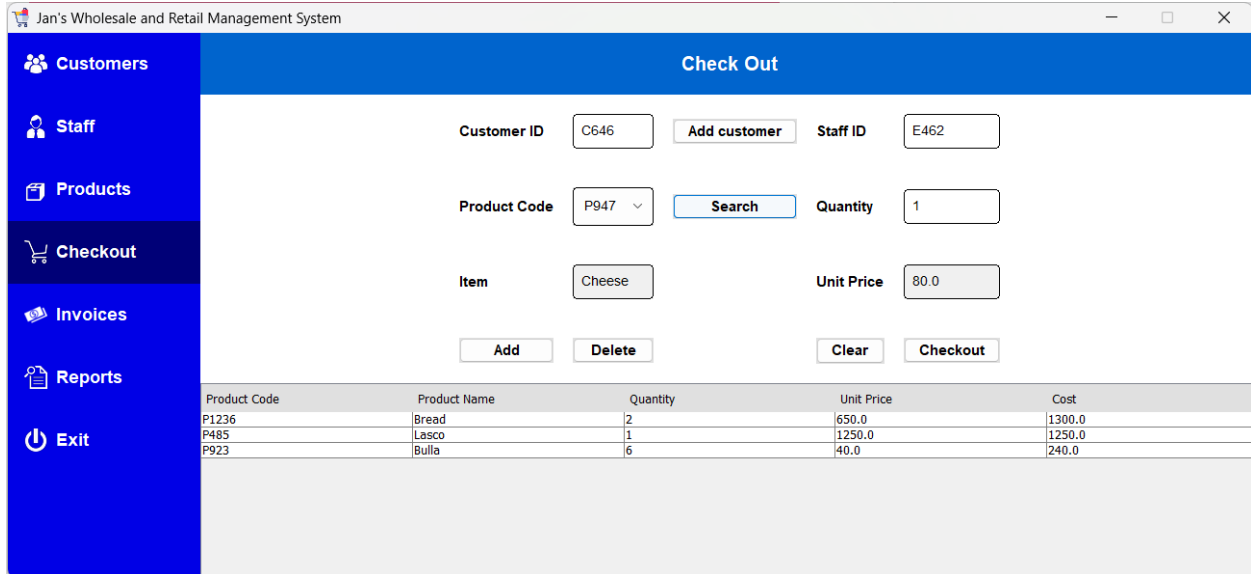

The screenshot shows a modal window titled "Add New Customer". It contains the following fields and controls:

- ID:** A text input field containing the value "c773".
- First Name:** An empty text input field.
- Last Name:** An empty text input field.
- Date of Birth:** Three dropdown menus showing "1", "January", and "2000".
- Email:** An empty text input field.
- Address:** An empty text input field.
- Phone #:** An empty text input field.
- Membership Date:** Three dropdown menus showing "1", "January", and "2000".
- Expiry Date:** Three dropdown menus showing "1", "January", and "2000".
- Buttons:** At the bottom, there is a blue button labeled "ADD CUSTOMER" and a white button labeled "Cancel".

- Customer IDs are auto-created by the system. Users are only required to enter the rest of the customer's information. The ID number displayed in the ID field should be given to the customer being added for future use. After entering the customer information, click the add customer button highlighted in blue above to add the customer to the system's database. Select the cancel button to cancel the addition of a new customer.

- **Search for product**

- The search button searches the inventory for the product selected and displays the corresponding data to the user.

The screenshot shows a web application window titled "Jan's Wholesale and Retail Management System". The interface has a blue sidebar on the left with navigation links: Customers, Staff, Products, Checkout (highlighted), Invoices, Reports, and Exit. The main content area is titled "Check Out" and contains several input fields and buttons. At the top, there are fields for "Customer ID" (C646) and "Staff ID" (E462), each with an "Add customer" button. Below these are fields for "Product Code" (P947), "Quantity" (1), and "Item" (Cheese). A "Search" button is next to the Product Code field. Below the Item field is a "Unit Price" field showing 80.0. At the bottom of the form are buttons for "Add", "Delete", "Clear", and "Checkout". Below the form is a table displaying the current cart items.

Product Code	Product Name	Quantity	Unit Price	Cost
P1236	Bread	2	650.0	1300.0
P485	Lasco	1	1250.0	1250.0
P923	Bulla	6	40.0	240.0

- **Add Products to Cart**

- The add button adds the product selected and quantity entered to the table(cart) which displays product details, cost per product unit, and total cost for the product quantity selected.

- **Delete Products from the Cart**

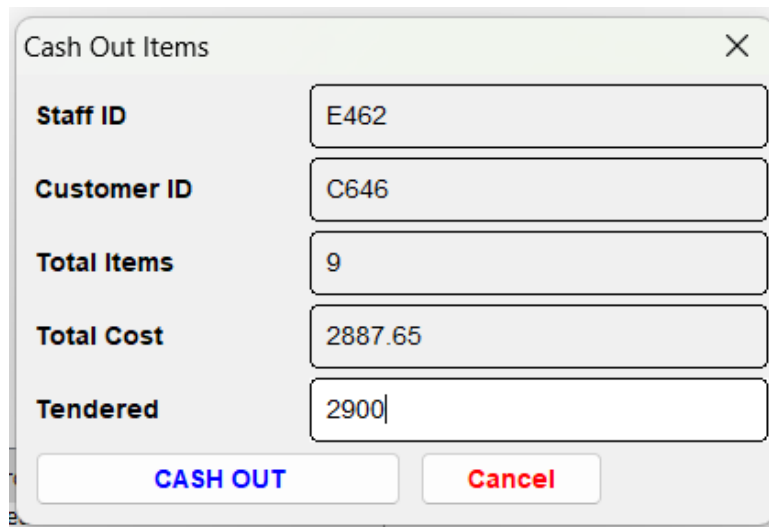

- The delete button removes a selected product from the table(cart) before checking out a customer.

- **Clear Cart**

- The clear button empties the table(cart) and text fields to process a new customer

- **Checkout Items**

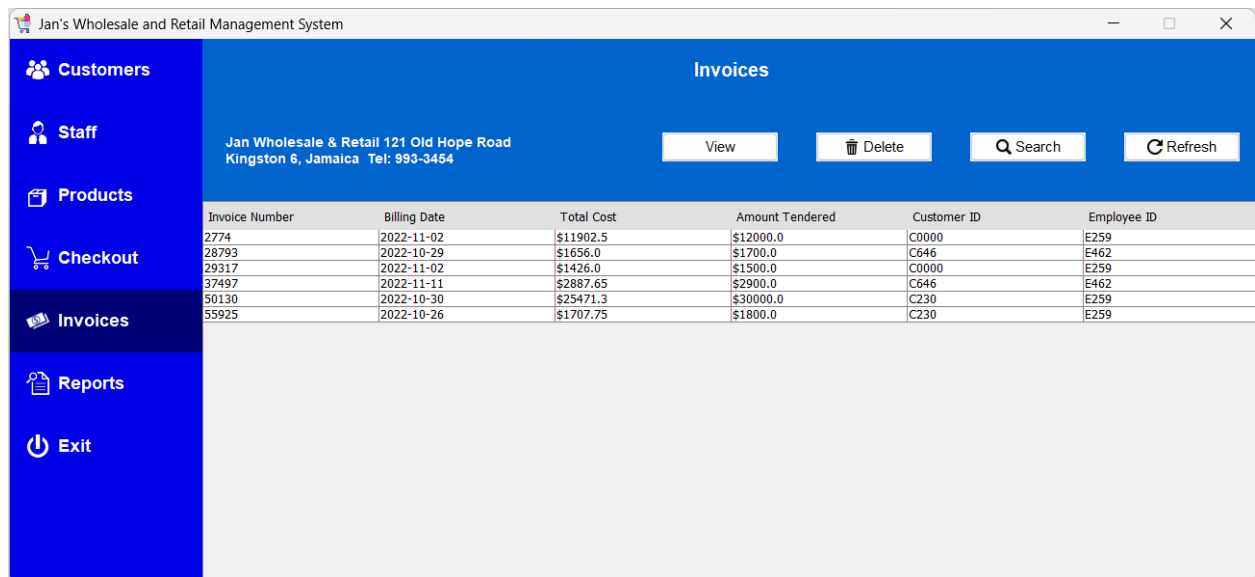

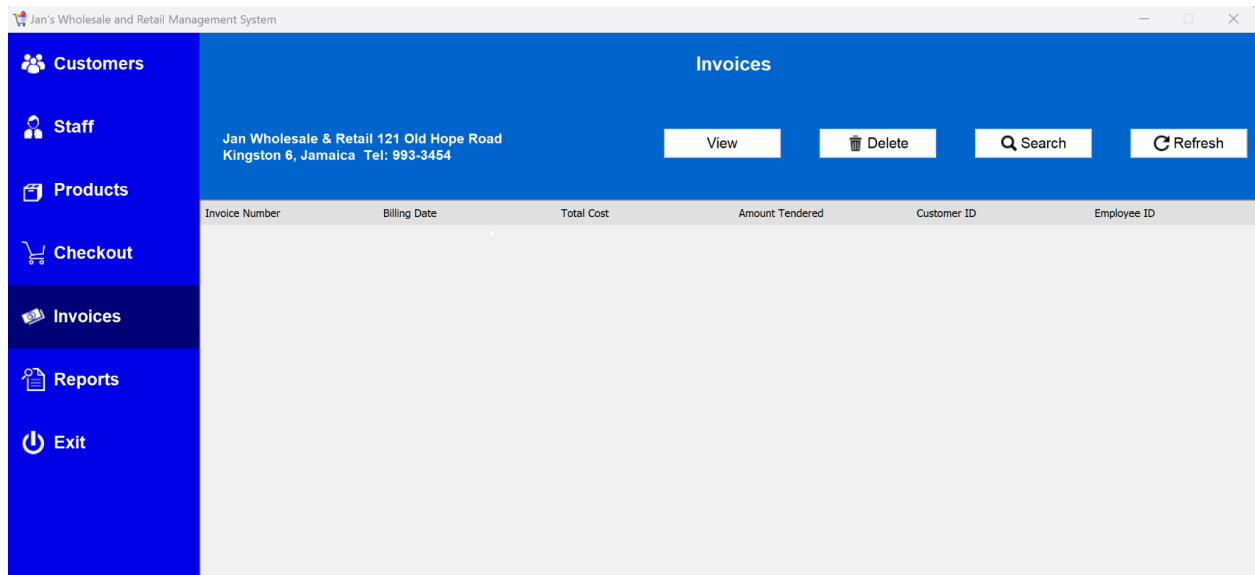

- The checkout button brings the user to the cashing screen after ensuring that a valid staff ID and customer ID were entered before proceeding to cash out. The cashout screen is displayed below in figure 2.0.

A screenshot of a 'Cash Out Items' dialog box. The dialog has a title bar with a close button (X). It contains five input fields with labels on the left: 'Staff ID' (value: E462), 'Customer ID' (value: C646), 'Total Items' (value: 9), 'Total Cost' (value: 2887.65), and 'Tendered' (value: 2900). At the bottom, there are two buttons: 'CASH OUT' in blue text and 'Cancel' in red text.

Field	Value
Staff ID	E462
Customer ID	C646
Total Items	9
Total Cost	2887.65
Tendered	2900

Invoice Screen

On the Invoice Screen, you may view a list of all invoices. This screen shows a list of purchases and it is used to track and maintain information about each purchase. At the top of the screen, there are four(4) actions that can be performed:

- **Viewing an invoice**
 - The view button is used to display the selected invoice in greater detail

This screen generates a report on a particular product over a specific period for Jans Wholesale and Retail Company to analyze the demand for a particular product. On the left side of the screen, Two (2) actions can be performed:

- **Generate a Report**

- The "Generate Report" button will fetch and display detailed information about a specific product over a specified period. This detail shows the number of items in stock and how many remain after the specified period (i.e., the total purchase).

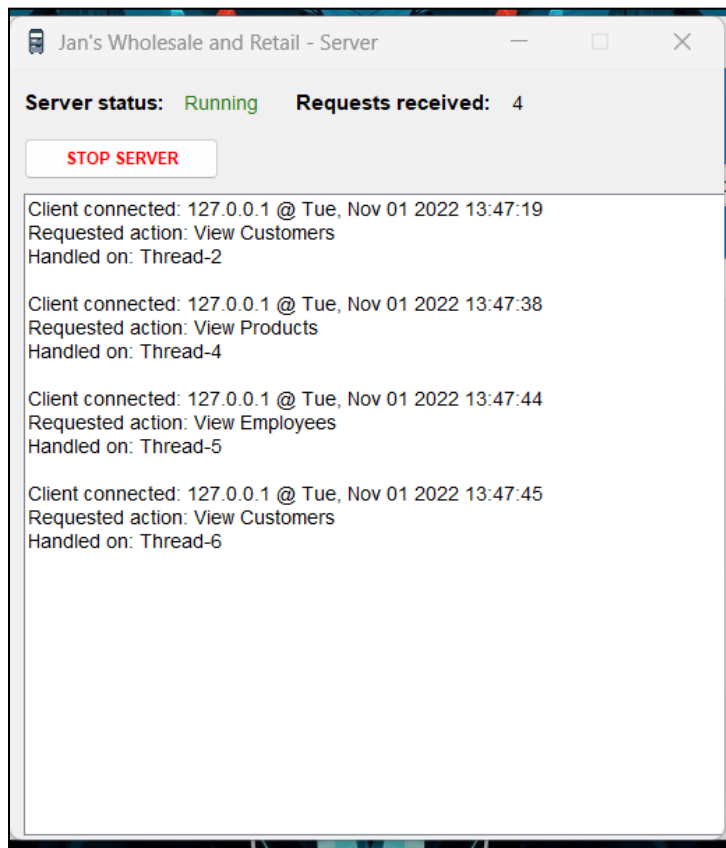

- **Print the report**

- The "Print" button will capture the generated report and initiate the system print dialog to send to a printer or PDF file.

Server Side Interface

An application used by IT staff to monitor and troubleshoot server issues.

Server Control Panel

This window provides an overview of the running state of the server, requests received, and a live event log of all activity on the server. The control panel allows you to see the IP Address and timestamp of all requests sent to the server, along with the action requested.

The "Stop Server" button allows you to terminate the running server instance. **NB: All client applications will cease to function while the server is down.**

The server should only be stopped for maintenance or after work hours when no processing is occurring.

Server-Side Logs

For security, auditing, and troubleshooting, a log file is generated and updated while the server is running.

The log file can be found at **logs/eventlogs.log**.
